The outdoor area is designed in a Mediterranean style, featuring a pool with heating preparation, a summer kitchen, an irrigation system, and covered parking for multiple vehicles.

The house is built in a traditional Istrian style with a stone façade, complemented by a modern interior and a high level of comfort. Underfloor heating via a heat pump and a fan-coil cooling system ensure a pleasant stay throughout the year. The property is connected to the municipal water supply and sewage system.

At this stage of construction, the future owner can choose finishing materials and customize the interior according to their preferences. The completion of the work is planned for the end of 2026.

This property is ideal for a peaceful family life or as an investment for tourist rental.
